General Office: 101 Park Avenue, New York City

Officers

President, MADISON GRANT

Vice-Presidents, W. REDMOND CROSS^{*} AND KERMIT ROOSEVELT

Chairman, Executive Committee, MADISON GRANT

Treasurer, CORNELIUS R. AGNEW

Secretary, HENRY FAIRFIELD OSBORN, JR.

Scientific Staff

Zoological Park

W. REID BLAIR, *Director*

WILLIAM T. HORNADAY, *Director Emeritus*

RAYMOND L. DITMARS, *Curator of Mammals and Reptiles*

LEE S. CRANDALL, *Curator of Birds*

CHARLES V. NOBACK, *Veterinarian*

CLAUDE W. LEISTER, *Ass't to the Director and Curator, Educational Activities*

H. C. RAVEN, *Prosector*

EDWARD R. OSTERNDORFF, *Photographer*

WILLIAM BRIDGES, *Editor and Curator of Publications*

Aquarium

CHARLES H. TOWNSEND, *Director*

C. M. BREDER, JR., *Assistant Director*

Department of Tropical Research

WILLIAM BEEBE, *Director and Honorary Curator of Birds*

JOHN TEE-VAN, *General Associate*

GLORIA HOLLISTER, *Research Associate*

Editorial Committee

MADISON GRANT, *Chairman*

W. REID BLAIR

WILLIAM BEEBE

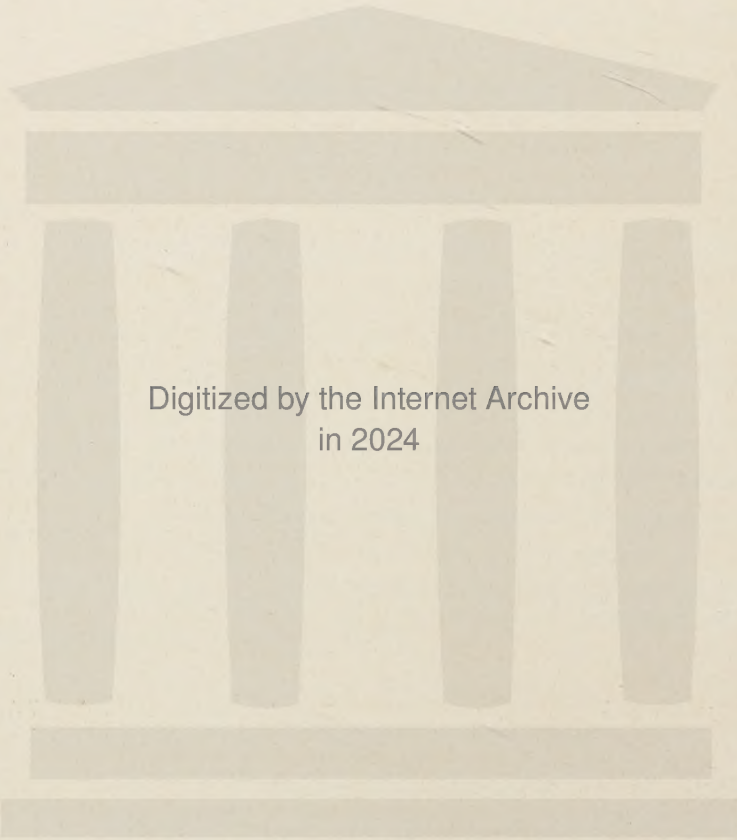

CHARLES H. TOWNSEND

GEORGE BIRD GRINNELL

WILLIAM BRIDGES

TITLES OF PAPERS

	PAGE
1—The distribution of certain whales as shown by logbook records of American whaleships..... <i>Charles Haskins Townsend</i>	1
2—The vampire bat. A presentation of undescribed habits and review of its history. <i>Raymond L. Ditmars & Arthur M. Greenhall</i>	53
3—A second list of Antillean reptiles and amphibians. <i>Thomas Barbour</i>	77
4—The reproductive habits of the common catfish, <i>Ameiurus nebulosus</i> (Le Sueur), with a discussion of their significance in ontogeny and phylogeny..... <i>C. M. Breder, Jr.</i>	143
5—Sex recognition in the guppy, <i>Lebistes reticulatus</i> Peters. <i>C. M. Breder, Jr. & C. W. Coates</i>	187
6—The fishes of Union Island, Grenadines, British West Indies, with the description of a new species of star-gazer. <i>William Beebe & Gloria Hollister</i>	209

LIST OF ILLUSTRATIONS

THE DISTRIBUTION OF CERTAIN WHALES AS SHOWN BY LOGBOOK RECORDS OF AMERICAN WHALESHIPS

	PAGE
Fig. 1. A Nineteenth Century Whaler, the Bark <i>Morning Star</i> , of New Bedford	2
Fig. 2. A chart of ocean currents.....	6
Pl. I. Distribution of the sperm whale based on logbook records dating from 1761 to 1920. Chart A—April-September, inclusive	In pocket
Pl. II. Distribution of the sperm whale based on logbook records dating from 1761 to 1920. Chart B—October-March, inclusive	In pocket
Pl. III. Distribution of the northern and southern right whales based on logbook records dating from 1785 to 1913. Chart C	In pocket
Pl. IV. Distribution of bowhead and humpback whales based on logbook records—mostly Nineteenth Century. Chart D	In pocket

THE VAMPIRE BAT. A PRESENTATION OF UNDESCRIBED HABITS AND REVIEW OF ITS HISTORY.

Fig. 3. Head of vampire bat, <i>Desmodus rotundus murinus</i> Wagner	68
Pl. V. Fig. 4. Spear-nosed bat, <i>Phyllostomus hastatus panamensis</i> Allen.	
Fig. 5. Vampire bat, <i>Desmodus rotundus murinus</i> Wagner, walking.	
Fig. 6. Vampire bat, <i>Desmodus rotundus murinus</i> Wagner, walking	Opp. 68
Pl. VI. Fig. 7. Vampire bat, <i>Desmodus rotundus murinus</i> Wagner, drinking blood.	
Fig. 8. Vampire bat, <i>Desmodus rotundus murinus</i> Wagner, at completion of meal.	
Fig. 9. Vampire bat, <i>Desmodus rotundus murinus</i> Wagner, preparing to leap upward for flight.....	Opp. 70
Pl. VII. Fig. 10. Positions assumed by the vampire bat, <i>Desmodus</i> <i>rotundus murinus</i> Wagner, in clinging to an animal with thick pelage.	
Fig. 11. Another view	Opp. 72

THE REPRODUCTIVE HABITS OF THE COMMON CATFISH,
AMEIURUS NEBULOSUS (LE SUEUR), WITH A DISCUSSION OF
 THEIR SIGNIFICANCE IN ONTOGENY AND PHYLOGENY.

Fig. 12.	<i>Ameiurus nebulosus</i> . After a site for the nest is selected, the pair of catfishes spend much time resting quietly side by side with the tails pointing out.....	180
Fig. 13.	As spawning becomes more imminent the fishes become active and circle continually in an agitated fashion...	180
Fig. 14.	<i>Ameiurus nebulosus</i> . Just before spawning, the circle that their two bodies form flattens so that the fish are in contact, head to tail.....	181
Fig. 15.	At the moment of egg laying. The accumulating pile of eggs may be seen under the female.	
Fig. 16.	<i>Ameiurus nebulosus</i> . Immediately after spawning the fishes separate slightly and rest.....	182
Fig. 17.	Sometimes a clump of eggs is dislodged and knocked out of the nest. Here the female is feeling them with her barbels.	182
Fig. 18.	<i>Ameiurus nebulosus</i> . A typical pose of the female on her eggs.	183
Fig. 19.	The yawning of the brooding fish which is characteristic and may aid in aeration.....	183
Fig. 20.	<i>Ameiurus nebulosus</i> . Both parents incubating at the same time.	184
Fig. 21.	Both parents "rounding up" the young fish, which may be seen as an oval black spot between them.....	184
Fig. 22.	<i>Opladelus olivaris</i> . Typical posture of an incubating male..	185
Fig. 23.	<i>Opladelus olivaris</i> . Typical posture of an incubating male..	185

SEX RECOGNITION IN THE GUPPY, *LEBISTES RETICULATUS*
 PETERS.

Fig. 24.	Graphic arrangement of reactions of male <i>Lebistes</i> in a study of sex recognition.....	194
Fig. 25.	Graphic arrangement of conditioning of male <i>Lebistes</i> to females in a beaker floated in their aquaria, and to empty beakers.....	197

THE FISHES OF UNION ISLAND, GRENADINES, BRITISH
 WEST INDIES, WITH THE DESCRIPTION OF
 A NEW SPECIES OF STAR-GAZER.

Fig. 26.	Panorama of Chatham Bay, Union Island, with the <i>Antares</i> at anchor.....	210
Fig. 27.	<i>Gillellus quadrocinctus</i>	222
